

# Together We Can Get Health Care Right

Americans are wondering about how Congress's proposed health reforms will affect them.

The non-partisan Congressional Budget Office estimates that one current health reform plan will cost \$1 trillion over the next 10 years. The Lewin Group, a respected health care consulting firm, estimates that 119 million people could lose their employer-provided health insurance if Congress creates a government-run public plan.

Now is the time to contact your elected officials and let them know that we can't afford another failed attempt at fixing the system. Congress must make health care affordable for every American. This time, we need to get health care right.

Find out what you can do to make sure  
health care reform works for all Americans at
